MULTISTORE MANAGER

The perfect solution for owners of multiple stores or small to medium size retail organizations that want to share management resources.

Manage

Master Item File
Manage Categories and Vendors
Manage Promotions
Centrally order items for all stores
Easily transfer stock from one location to another

Connect
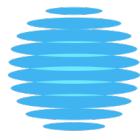

Global Customer Management
Sophisticated Loyalty System
Import data from wholesalers or a banner office

Be Efficient

Eliminate duplication of common store level tasks such as managing items and vendors.
Reduce errors by replicating a single common set of data.
Use the best person for tasks regardless of physical location.

Understand

Central Reporting for all stores
Compare store performance
Quickly identify dead inventory

PEER TO PEER

The solution for owners of multiple stores that want to leverage the benefits of centrally managed data by using one store as a template for satellite stores.

Central Item Management

- Use one location as the Item Master
- Central Categories and Vendors
- Selectively push data to satellite stores

Central Inventory

- Easy store to store transfers
- Enterprise inventory on hand lookup
- "Dead Stock" utility identifies slow moving items and the ability to instantly put them on sale.

Central Promotions

- Centrally create promotions
- Push promotions to satellite stores
- Assure items are the same price across multiple locations

Central Reporting

- Central reporting with automated scheduling and email delivery.
- Option Datawarehouse with Business Intelligence Dashboards
